

EchoStar Corporation Investor Overview

February 2021

Safe Harbor Statement

This presentation may contain statements that are forward looking, as that term is defined by the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based on management's beliefs as well as assumptions made by, and information currently available to, management. When used in this presentation, the words "believe," "anticipate," "estimate," "except," "intend," "project," "plans," and similar expressions, and the use of future dates are intended to identify forward-looking statements. Although management believes that the expectations reflected in these forward-looking statements are reasonable, it can give no assurance that these expectations will prove to have been correct. You are cautioned not to place undue reliance on any forward-looking statements, which speak only as of the date made. We assume no responsibility for the accuracy of forward-looking statements or information or for updating forward-looking information or statements. These statements are subject to certain risks, uncertainties, and assumptions. See "Risk Factors" in EchoStar's Annual Report on Form 10-K for the year ended December 31, 2020 as filed with the Securities and Exchange Commission and in the other documents EchoStar files with the Securities and Exchange Commission from time to time.

State of Our Business

2020 Revenue of \$1.9b, Net Loss of \$52m, and Million HughesNet Adjusted EBITDA of \$643m subscribers Strong balance sheet with no net debt Offering consumer service S-Band Licenses over in the US and **Europe and Mexico Latin America** with terrestrial access **Diversified Enterprise Global NGSO Business with S-Band Rights** substantial backlog HTS satellite (Jupiter 3) Existing fleet of 7 owned under construction that and 3 leased Ka, Ku, and will more than double S-band payloads/satellites sellable Ka-band capacity

Our Global Presence

Connecting People, Enterprises, and Things Everywhere

 Deliver essential broadband services and solutions through the largest high-throughput satellite network over the Americas at the lowest cost per bit

 Complement our GEO fleet with NGSO/LEO capacity and other technologies to extend coverage to our customers and significantly increase the size of the market we can address

Continue as a trusted partner for technology solutions and services globally that support ubiquitous connectivity

Develop and monetize our portfolio of spectrum assets in a variety of ways including full integration of S-band solutions into 5G networks

Our Business Segments

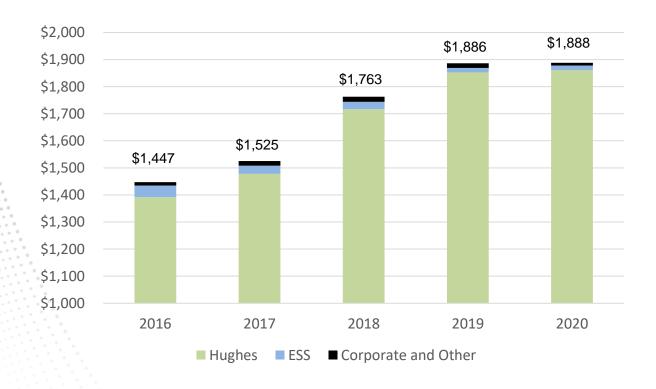

in Africa, the Middle East, and SW Asia

Recent Highlights

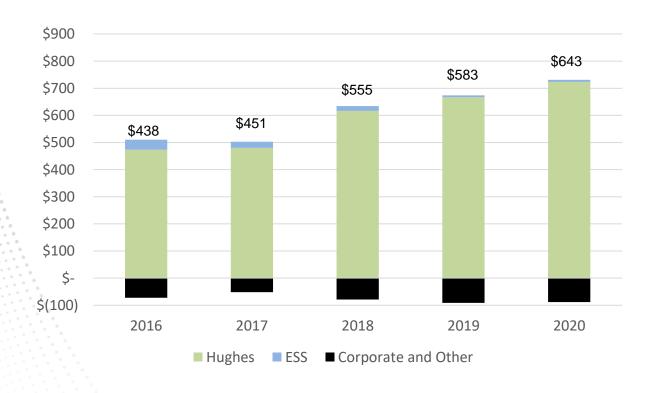

- Revenue of \$489m in Q4-20 and \$1,888m FY-2020
- Net Loss of \$3m in Q4-20 and Net Loss of \$52m FY-2020
- Adjusted EBITDA of \$167m in Q4-20 and \$643m FY-2020
- Free Cash Flow, defined as Adjusted EBITDA minus Capital Expenditures, of \$53m in Q4-20 and \$234m FY-2020
- Strong balance sheet Cash and Marketable securities of \$2.5b with net debt of zero
- Repurchased 1.7m shares of Class A common stock in Dec-2020 and 2.9m shares from January 1, 2021 through February 11, 2021
- Secured \$250m Ground System Development and Production contract with OneWeb (LEO) and completed equity investment
- Recognized by U.S. News & World Report 360 Reviews as the Best Satellite Internet Provider of 2021

Revenue (\$m)

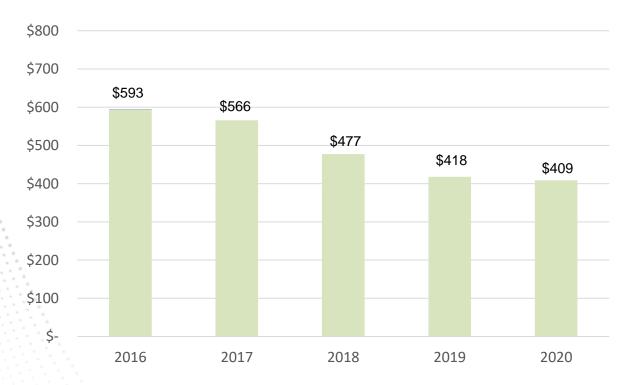

- 7% 4-Year CAGR (2016 2020) for consolidated EchoStar
- 8% 4-Year CAGR for Hughes segment (2016 – 2020)
- EchoStar 17/ Jupiter 2 in service Q2-17

Adjusted EBITDA (\$m)

- 10% 4-year CAGR (2016 2020) for consolidated EchoStar
- 11% 4-year CAGR for Hughes segment (2016 – 2020)
- EchoStar 17/ Jupiter 2 in service Q1-17
- Corporate and Other includes equity of unconsolidated affiliates which causes some variability

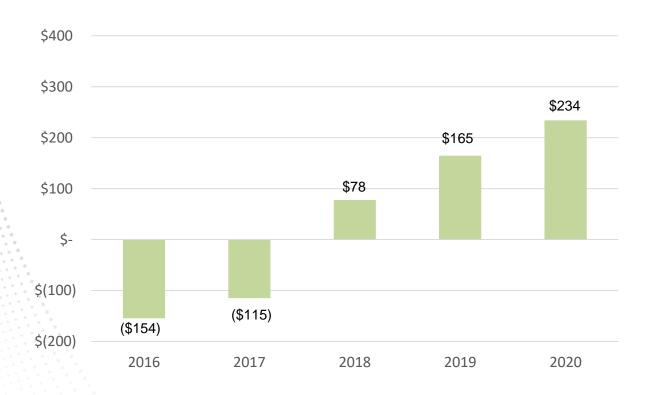

Capital Expenditures (\$m)

 Main categories of capital expenditures include consumer premise, new satellites and associated infrastructure, enterprise solutions, and other corporate needs

2016 estimated for continuing operations post BSS transaction which was completed in 2019

Free Cash Flow (\$m)

 Free Cash Flow defined as Adjusted EBITDA less capital expenditures

Liquidity and Leverage (\$m)

Hughes Segment

Hughes

Hughes

Consumer

- ~ 69% of revenues in Q4-20
- 1.189m US subscribers as of 12/31/20
- 375k subscribers in Brazil, Colombia, Peru, Ecuador, Chile, and Mexico
- High incremental margins driven by owner economics on satellites
- Community Wi-Fi with Facebook
- US constrained until J3 launch but available LatAm capacity expected to drive growth
- Brazil operations 80% ownership of JV with Yahsat

Enterprise

- ~ 31% of revenues in Q4-20
- Backlog of \$1.3 billion as of 12/31/20
- Managed service provider for Enterprises and Governments on a global basis
- Operating service entities in the US, Europe, Brazil (80% ownership), and India (85% ownership)
- Equipment and Infrastructure sales in more than 100 countries
- OneWeb LEO technology partner
- Mobile Satellite services group focused on IOT and mobility applications

Other

- JV with Yahsat to provide satellite broadband services across Africa, the Middle East, and SW Asia. 20% ownership included in equity in unconsolidated affiliates
- 43% ownership in
 Hughes Systique, a
 provider of R&D
 software services,
 included in consolidated
 results

Hughes Consumer – US Addressable Market

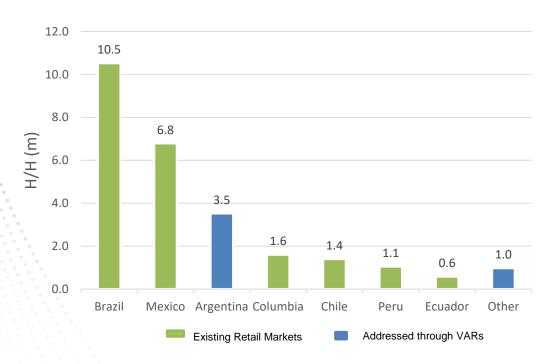

- 138m Households (H/H) in the United States: ~ 14.5m currently included in addressable market
- By only requiring low cost CPE to be installed at the service location, Hughes provides broadband services to areas that are financially unattractive to other technologies

- FCC 477 file represents 6.7m H/H have no access or access to speeds <25 Mbps
- We estimate an additional 7.9m H/H that have access to speeds <25 Mbps based on internal estimates and third party research
- We anticipate an expansion of our addressable market with the J3 launch due to the ability to better compete with 3m DSL H/H that have access to service between 25 and 50 Mbps

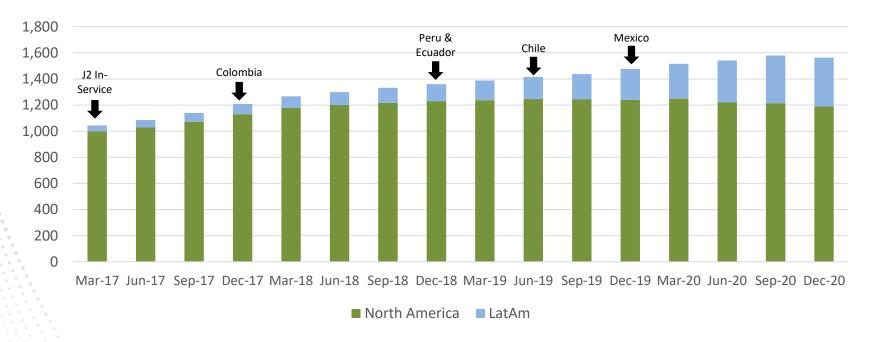

Hughes Consumer – LatAm Addressable Market

- ~ 179m households (H/H) in the major Latin American countries
- 26m upper income households are in unserved and underserved areas

- Retail consumer services in Brazil, Mexico, Columbia, Chile, Peru, and Ecuador
- Other markets addressed through VARs
- Brazil accounts for 40% of addressable market of 26m
- Satellite is not only rural. Sao Paulo, Brazil, with extensive infrastructure, is the largest source of HughesNet Brazil subscribers. Other countries have similar characteristics

Hughes Consumer – Subscriber Trends (000)

- Actively managing our US sales and marketing efforts to optimize service to our existing customers. Strong capacity demand driving increases to ARPU
- Supported by Jupiter 1 (E17), Jupiter 2 (E19), SPACEWAY 3, Al Yah 3, Eutelsat 65WA and Telesat T19V
- Jupiter 3, once in service, will more than double our sellable Ka capacity

Hughes Enterprise

Enterprise

Managed Service Provider

- Leading provider to US large blue chip and medium/small enterprises as well internationally in Brazil, India, and across Europe
- Diversified portfolio of customers across a range of industries including Lottery, Retail, Hospitality, Restaurant, Finance and Banking, and Oil and Gas
- Utilize a variety of communication technologies including terrestrial

Equipment Sales

- Leading global supplier of satellite ground infrastructure and terminals
- #1 global VSAT provider with 50% VSAT market share
- Scalable systems allowing growth from startup to massive consumer buildouts
- Industry leading technology providing increased efficiency and profitability
- Equipment in use on more than 1,100 aircraft worldwide

Other

- OneWeb (LEO) technology partner
- Support service to IFC providers
- Government programs including Defense
- MobileSat Solutions Group

GEO versus LEO

- GEO and LEO systems are expected to be complementary, and as new systems come on-line and mature, the optimal solution will be a hybrid of both
- GEO provides targeted high capacity at a low cost per bit while LEO provides ubiquitous coverage and supports low latency applications
- EchoStar invested \$50m in OneWeb (LEO), develops and manufactures essential ground equipment for the OneWeb satellite constellation, and agreed in principle to continue as a distribution partner

GEO

- 100% of capacity in areas where there are customers
- Provides speed and bandwidth at an attractive price
- The #1 use of internet is video which is well suited for GEO
- Successful track record

LEC

- Capacity is evenly distributed across the Earth's surface ~ 70% covered by water
- Well suited for enterprise verticals including government and mobility applications like aeronautical and maritime
- Cost of phased-array antenna not suited for consumer application
- Modern LEO systems in testing phase
- Regulatory / Orbital debris and collision risk

EchoStar Satellite Services (ESS)

- Fixed Satellite Services (FSS)
 - ✓ Full and part-time Ku-band transponder capacity
 - Enterprise, broadcast, and government services applications
 - Fleet consists of two FSS Satellites:
 - EchoStar 105: Pre-paid lease with SES. Launched in 2017 and resides in the 105 degree west slot
 - EchoStar 9: Owned satellite. Launched in 2003 and resides in the 121 degree west slot

Corporate and Other Segment

Corporate and Other

EchoStar Global

- Portfolio of attractive global spectrum
- Goal to deploy a hybrid GEO/NGSO satellite infrastructure that will support service provision on a global basis
- Support future communication standards including 3GPP/5G and narrowband applications such as IOT
- Anomalies with first two launched satellites, but seeking regulatory relief due to force majeure events
- Third nanosatellite expected to launch in Q2 or Q3 of 2021

EchoStar Mobile

- Operates a mobile satellite network with complementary ground component providing connectivity services to businesses across Europe and the North and Mediterranean Seas
- Target market is for applications in connected vehicle, industrial, fisheries, resource extraction, and environmental and Smart-Grid monitoring
- Licenses for 30 MHz of 2GHz MSS spectrum with covering 500m POP's
- Support provided by the EchoStar
 21 satellite and Eutelsat 10A S-Band payload

Other

- Shared Services
 Organization (IT/Legal/etc)
- Dish Mexico Joint Venture equity investment (49%)
- Deluxe Joint Venture equity investment (50%)
- Other Strategic Investments
- EchoStar 24 / Jupiter 3 satellite construction

Corporate and Other – S-band Strategy

- Developing a unique portfolio of global S-band spectrum rights, including rights to develop hybrid next-gen mobile satellite services integrated with complementary terrestrial rights; developing similar rights in other attractive frequency bands
- ITU priority to utilize up to 75 MHz of S-band globally for new 5G NGSO network; New networks will leverage/integrate in-orbit GEO assets and priority filings covering the Americas, Europe, Middle East and Africa
- Planned network features include:
 - ✓ Global 5G connectivity with seamless terrestrial integration
 - ✓ Fully cloud integrated open/standards-based ecosystem
 - Application focused; embedded with OEMs
- High value emerging vertical markets include:
 - ✓ Consumer 5G services
 - ✓ Aero and UAV (urban air mobility and autonomous delivery)
 - ✓ Ubiquitous 5G automotive connectivity
 - ✓ Public protection and disaster Relief
 - Health monitoring

Summary

Maccommunicitie

Outlook

Strong core business delivering essential broadband services and solutions

 Jupiter 3 satellite, which will more than double sellable Ka capacity, expected to drive robust growth in consumer markets as well as provide additional enterprise opportunities including cellular backhaul and Wi-Fi hotspots

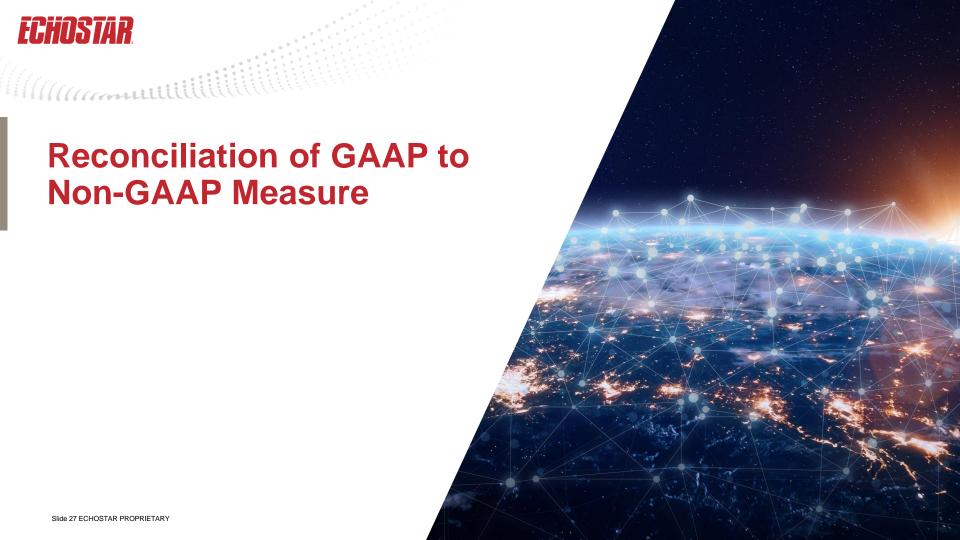

Engineering expertise and technology innovator

 Evolving complex hybrid networks anticipated to increase the size of our addressable market significantly

 Well positioned with S-band assets to participate in the evolution of 5G and IOT focused markets

 Strong balance sheet; continue to seek opportunities to deploy cash for both organic and inorganic growth
