

HughesNet Gen5 Surpasses 100,000 Subscribers In Just Two Months

June 5, 2017

GERMANTOWN, Md., June 5, 2017 /PRNewswire/ -- Hughes Network Systems, LLC (HUGHES) today announced its recently launched HughesNet Gen5 satellite Internet service has reached a major milestone in just two months - now serving more than 100,000 homes and small businesses, including both new subscribers and upgrades, and subscribers in every continental U.S. state have been connected to the service.

Launched in late March 2017, new customers to HughesNet Gen5 are experiencing faster speeds, more data, built-in Wi-Fi and an overall improved Internet experience. HughesNet Gen5 is the first and only U.S. satellite Internet service to offer Federal Communications Commission (FCC) defined broadband speeds - 25 Mbps download and 3 Mbps upload - from coast-to-coast.

"The new HughesNet Gen5 is meeting the need for high-speed Internet in households and small businesses across the country - especially in areas underserved or unserved by 'traditional' wired Internet," said Mike Cook, executive vice president at Hughes. "Everyone has the right to high-speed Internet access and Hughes is proud to bring fast, reliable Internet to all households coast-to-coast across America, no matter where they live or work."

Early customer responses show they are enjoying higher satisfaction and improved performance from the new HughesNet Gen5 service. According to Joe K. from Illinois, "I've seen a big boost in performance with HughesNet Gen5, giving me the true broadband speeds I've wanted. The overall experience is just a lot better."

HughesNet is America's #1 choice for satellite Internet with more than one million subscribers nationwide. HughesNet Gen5 is available in a variety of affordable consumer and business plans to suit customer's specific needs. Plans range from 10 to 250 GB/month of data with the same fast speeds of 25 Mbps on every plan. Additional features include:

- Built-in Wi-Fi to easily connect wireless devices
- No hard data limits - if monthly plan data is exceeded, service continues at a reduced speed until the next billing cycle
- Video Data Saver to watch more videos using less data
- Bonus Zone - 50 GB of free data per month to use during off-peak hours (2 a.m. - 8 a.m.)

HughesNet Gen5, recently named the winner of a Gold Stevie® Award in the Consumer Services category in the 15th annual American Business Awards, is available through a nationwide network of dealers and sales agents, as well as directly through www.HughesNet.com.

About Hughes Network Systems

Hughes Network Systems, LLC (HUGHES) is the global leader in broadband satellite technology and services for home and office. Its flagship high-speed satellite Internet service is HughesNet®, the world's largest satellite network with over 1 million residential and business customers across North America and Brazil. For large enterprises and governments, the company's HughesON® managed network services provide complete connectivity solutions employing an optimized mix of satellite and terrestrial technologies. The JUPITER™ System is the world's most widely deployed High-Throughput Satellite (HTS) platform, operating on more than 20 satellites by leading service providers, delivering a wide range of broadband enterprise, mobility and cellular backhaul applications. To date, Hughes has shipped more than 5.5 million terminals to customers in over 100 countries, representing over 50 percent market share, and its technology is powering broadband services to aircraft around the world.

Headquartered outside Washington, D.C., in Germantown, Maryland, USA, Hughes operates sales and support offices worldwide, and is a wholly owned subsidiary of EchoStar Corporation (NASDAQ: SATS), a premier global provider of satellite operations.
