

Hughes Wins NASPO Contract to Provide Internet Solutions for Participating States

July 16, 2019

Under ValuePoint Cooperative Purchasing Agreement, HughesNet for Business to Connect State and Local Government Locations

GERMANTOWN, Md., July 16, 2019 /PRNewswire/ -- [Hughes Network Systems, LLC](#) (HUGHES), the global leader in broadband satellite networks and services, today announced it has been awarded a NASPO (National Association of State Procurement Officials) ValuePoint contract to deliver HughesNet® for Business to state agencies and eligible political subdivisions. Under the agreement, Hughes will provide its flagship high-speed satellite Internet service, HughesNet, to state and local government offices and facilities, including police and fire stations, park offices, schools and libraries, and environmental monitoring stations in participating states.

"Today, the Internet is essential for every kind of organization, including local government agencies that provide fundamental services to citizens in all corners of the states – including places unserved or underserved by terrestrial fixed or wireless access," said Tony Bardo, assistant vice president of government solutions at Hughes. "Connecting state offices and locations to the Internet with high quality satellite broadband—available nationwide—enables a more responsive and agile government for everyone."

With download speeds of 25 Mbps available from coast to coast, HughesNet has been ranked first by the Federal Communications Commission (FCC) in its Measuring Broadband America report among all Internet service providers (ISPs) nationwide—including cable, fiber, satellite and DSL providers—in meeting or exceeding advertised download speeds.

Twenty-two states have indicated their intent to participate in the contract. Hughes is the only satellite Internet provider on the NASPO ValuePoint contract and was selected to deliver services under Award Category 4: Alternative Wireless Transport Options. To view the specific services from Hughes that are available on the contract, visit <https://www.naspo.valuepoint.org/portfolio/wireless-voice-data/hughes-network-systems/>
