

HughesNet Named Best Satellite Internet Service Provider of 2021 by U.S. News & World Report

March 30, 2021

U.S. News Ranks HughesNet Among Top Best Internet Service Providers

GERMANTOWN, Md., March 30, 2021 /PRNewswire/ -- HughesNet®, the leading satellite internet service, has been recognized by U.S. News & World Report 360 Reviews as the [Best Satellite Internet Provider of 2021](#). U.S. News cites superior data performance and availability as competitive differentiators for HughesNet, the flagship high-speed satellite Internet service from [Hughes Network Systems, LLC](#) (HUGHES), an innovator in satellite communications for 50 years.

U.S. News' online guide features in-depth information on choosing an Internet service provider and covers a range of topics including connection type, download/upload speeds and data plans.

"The best rural internet option available today, HughesNet delivers essential broadband to communities, businesses and families across the U.S.," said Peter Gulla, senior vice president, Hughes. "The recognition from U.S. News is a welcome validation of our dedication to connecting the unconnected and our continuous enhancement of the HughesNet customer experience."

Today, HughesNet connects more than 1,500,000 families and businesses across the Americas at broadband speeds in areas that cable and wire-line providers have largely bypassed. The company continues to innovate to better serve customers; for example, optimizing the HughesNet network and developing a new satellite, JUPITER™ 3, that will deliver additional high-throughput capacity to meet customer needs.

HughesNet was named a top Internet service provider due to its capabilities in mitigating packet (data) loss in comparison to other satellite ISPs. According to the U.S. News review, its 20 GB plan offers customers the best data-for-price ratio. HughesNet was also recognized as a preferred service provider in rural areas due to its presence where other providers do not operate.

U.S. News evaluated Internet service providers based on type of plan, monthly cost and fees along with latency and consistency of connection type. U.S. News' 360 Reviews team applied an unbiased methodology that includes professional ratings and reviews, consumer ratings and reviews and research comparing various features of internet service providers.

About U.S. News & World Report
