"We are pleased with the progress of our Wireless business and year-over-year net add subscriber growth. In addition, our Pay-TV segment continues to drive improvements in ARPU and churn, and our in-flight connectivity business advances, scaling and driving interest from airlines worldwide."

Note on Use of Non-GAAP Financial Measures

OIBDA is defined as "Operating income (loss)" plus "Depreciation and amortization."

OIBDA, which is presented by segment above, is a non-GAAP measure reconciled to "Operating income (loss)" and does not purport to be an alternative to operating income (loss) as a measure of operating performance. We believe this measure is useful to management, investors and other users of our financial information in evaluating operating profitability of our business segments on a more variable cost basis as it excludes the depreciation and amortization expenses related primarily to capital expenditures and acquisitions for those business segments, as well as in evaluating operating performance in relation to our competitors.
