Note on Use of Non-GAAP Financial Measures

OIBDA is defined as "Operating income (loss)" plus "Depreciation and amortization."

Adjusted OIBDA is defined as "Operating income (loss)" plus "Depreciation and amortization" and "Impairments and other."

OIBDA and Adjusted OIBDA, which are presented by segment above, are non-GAAP measures reconciled to "Operating income (loss)" and do not purport to be alternatives to operating income (loss) as a measure of operating performance. We believe OIBDA is useful to management, investors and other users of our financial information in evaluating operating profitability of our business segments on a more variable cost basis as it excludes the depreciation and amortization expenses related primarily to capital expenditures and acquisitions for those business segments, as well as in evaluating operating performance in relation to our competitors.

We believe Adjusted OIBDA is useful to management, investors and other users of our financial information in evaluating operating profitability of our business segments as it excludes one-time, non-cash items that we do not consider to be reflective of our ongoing operating performance.
