THE ECHOSTAR/HUGHES MERGER

LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN ALABAMA

[ECHOSTAR LOGO]

[HUGHES LOGO]

-----  
FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 9 MARKETS IN ALABAMA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Alabama, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Alabama to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

---

ALABAMA

o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Alabama.

o About 1.2 million of the 1.7 million TV households in Alabama subscribe to a cable service, which equates to about 69% of all Alabama households.

[Map of the state of Alabama with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

ALABAMA

- o In Alabama, only those DBS TV households within the Atlanta and Birmingham et al television markets have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the two markets in Alabama in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Alabama and certain surrounding states with portions in color and with the phrase "423,000 DBS Subscribers" written across it.]

SKYRESEARCH, FEB. 2002;  
ECHOSTAR AND DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

ALABAMA

- o As shown by this map, Alabama TV households outside the Atlanta and Birmingham et al television markets do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 9 local channel markets in Alabama.

[Map of the state of Alabama and certain surrounding states with portions in color and the phrase "7 TV Markets Unserved" written across it.]

SKYRESEARCH, FEB. 2002;  
ECHOSTAR AND DIRECTV, JAN. 31, 2002

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

ALABAMA

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 9 markets in Alabama.

[Map of the state of Alabama and certain surrounding states with portions in color and the phrase "All 9 Markets Served" written across it.]

7 THE ECHOSTAR/HUGHES MERGER

SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]                      [110 degrees]                      [101 degrees]  
[Picture of satellite.]              [Picture of satellite.]              [Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative Channels Today" written across it.]

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

ALABAMA

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Alabama with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

ALABAMA

- o The merger will bridge the digital divide in Alabama by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Alabama and the country to a digital "have."

[Map of the state of Alabama filled entirely with color.]

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

---

- o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers-- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Alabama and all Americans.

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER

LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN ARIZONA

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 4 MARKETS IN ARIZONA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Arizona, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Arizona to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

ARIZONA

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Arizona.
- o About 1.1 million of the 1.9 million TV households in Arizona subscribe to a cable service, which equates to about 60% of all Arizona households.

[Map of the state of Arizona with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

ARIZONA

- o In Arizona, only those DBS TV households within the Albuquerque-Santa Fe and Phoenix television markets have a fully competitive multi-channel alternative to cable --WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the two markets in Arizona in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Arizona and certain surrounding states with portions in color and with the phrase "484,000 DBS Subscribers" written across it.]

ECHOSTAR AND DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

ARIZONA

- o As shown by this map, Arizona TV households outside the Albuquerque-Santa Fe and Phoenix television markets do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 4 local channel markets in Arizona.

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

ARIZONA

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 4 markets in Arizona.

[Map of the state of Arizona and certain surrounding states with portions in color and the phrase "All 4 Markets Served" written across it.]

LEGEND

[Colored box.] TV Households With Competitive Alternative After Merger

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

9 THE ECHOSTAR/HUGHES MERGER

SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
ECHOSTAR, HUGHES, FEB. 2002

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

ARIZONA

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Arizona with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

ARIZONA

- o The merger will bridge the digital divide in Arizona by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Arizona and the country to a digital "have."

[Map of the state of Arizona filled entirely with color.]

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE-- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. - o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Arkansas and all Americans.

- o One Nation, One Rate Card
- o Eliminates the "Digital Divide"

TRUE COMPETITION FOR 107 MILLION HOUSEHOLDS

---

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN CALIFORNIA

---

[ECHOSTAR LOGO]

[HUGHES LOGO]

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 14 MARKETS IN CALIFORNIA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

Continued...

---

-----  
...Continued

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in California, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in California to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

---

CALIFORNIA

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across California.
- o About 7.9 million of the 11.6 million TV households in California subscribe to a cable service, which equates to about 68% of all California households.

[Map of the state of California with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

CALIFORNIA

- o In California, only those DBS TV households within the Los Angeles, Sacramento et al, San Diego and San Francisco et al television markets have a fully competitive multi-channel alternative to cable -- with local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the four markets in California in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of California and certain surrounding states with portions in color and with the phrase "2,299,000 DBS Subscribers" written across it.]

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

CALIFORNIA

- o As shown by this map, California TV households outside the Los Angeles, Sacramento et al, San Diego and San Francisco et al television markets do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 14 local channel markets in California.

[Map of the state of California and certain surrounding states with portions in color and the phrase "10 TV Markets Unserved" written across it.]

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

CALIFORNIA

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 14 markets in California.

[Map of the state of California and certain surrounding states with portions in color and the phrase "All 14 Markets Served" written across it.]

7 THE ECHOSTAR/HUGHES MERGER

SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001; ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

LEGEND

[Colored box.] DBS Households Served by Local Channels After Merger

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

CALIFORNIA

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of California and certain surrounding states with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

CALIFORNIA

- o The merger will bridge the digital divide in California by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in California and the country to a digital "have."

[Map of the state of California filled entirely with color.]

---

12 THE ECHOSTAR/HUGHES MERGER

SOURCE: THE BUXTON COMPANY,  
"BROADBAND DEPLOYMENT,"  
JAN. 2002

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

TRUE COMPETITION FOR 107 MILLION HOUSEHOLDS

---

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. - o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Colorado with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

COLORADO

- o The merger will bridge the digital divide in Colorado by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Colorado and the country to a digital "have."

[Map of the state of Colorado filled entirely with color.]

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

---

- o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Colorado and all Americans.

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN CONNECTICUT

[ECHOSTAR LOGO]

[HUGHES LOGO]

FEBRUARY 2002

## THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 2 MARKETS IN CONNECTICUT.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Connecticut, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Connecticut to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

CABLE FRANCHISE AREAS

---

CONNECTICUT

- - Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Connecticut.
- - About 1.1 million of the 1.2 million TV households in Connecticut subscribe to a cable service, which equates to about 88% of all Connecticut households.

[Map of the state of Connecticut with portions in color.]

LEGEND

[Colored box.] CABLE FRANCHISE AREAS

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

CONNECTICUT

- - In Connecticut, only those DBS TV households within the New York television market have a fully competitive multi-channel alternative to cable -- WITH local channels.
- - Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- - DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- - In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the one market in Connecticut in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Connecticut and certain surrounding states with portions in color and with the phrase "112,000 DBS Subscribers" written across it.]

SKYRESEARCH, FEB. 2002;  
ECHOSTAR AND DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

CONNECTICUT

- - As shown by this map, Connecticut TV households outside the New York television market do not have a true competitive alternative to cable.
- - Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- - Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 2 local channel markets in Connecticut.

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

CONNECTICUT

- - DIRECTV and DISHNetwork engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- - The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 2 markets in Connecticut.

ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- - The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- - The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- - The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]                      [110 degrees]                      [101 degrees]

NATIONAL PRICING

---

- - Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- - For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

BROADBAND: THE DIGITAL "HAVE NOTS"

CONNECTICUT

- - Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- - This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- - The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- - Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Connecticut with portions in color.]

LEGEND

[Colored box.] HOUSEHOLDS WITHOUT BROADBAND ACCESS

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

CONNECTICUT

- - The merger will bridge the digital divide in Connecticut by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- - The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- - The merger will provide the technical and economic infrastructure to convert every household in Connecticut and the country to a digital "have."

[Map of the state of Connecticut filled entirely with color.]

- - Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- - An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- - New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- - Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

## SEC LEGEND

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. FEBRUARY 2002

THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 2 MARKETS IN DELAWARE.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Delaware, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Delaware to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

DELAWARE

- - DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- - The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 2 markets in Delaware.

[Map of the state of Delaware and certain surrounding states with portions in color and the phrase "All 2 Markets Served" written across it.]

ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

- - The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- - The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- - The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

WITH MERGER: SPECTRUM EFFICIENCIES ACHIEVED

DELAWARE

- - Implementation could begin immediately following merger approval, and the rollout can be completed as soon as 24 months later, allowing delivery of local channels to all .3 million TV households in Delaware.

[119 degrees] [110 degrees] [101 degrees]

ECHOSTAR, HUGHES, FEB. 2002

## NATIONAL PRICING

- - Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- - For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

BROADBAND: THE DIGITAL "HAVE NOTS"

DELAWARE

- - Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- - This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- - The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- - Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Delaware with portions in color.]

LEGEND

[Colored box.] HOUSEHOLDS WITHOUT BROADBAND ACCESS

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

DELAWARE

- - The merger will bridge the digital divide in Delaware by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- - The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- - The merger will provide the technical and economic infrastructure to convert every household in Delaware and the country to a digital "have."

[Map of the state of Delaware filled entirely with color.]

"BROADBAND DEPLOYMENT," JAN. 2002

ONE NATION, ONE DISH

- - Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- - An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- - New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- - Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

- - Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- - Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- - The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- - The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

## SEC LEGEND

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. THE ECHOSTAR/HUGHES MERGER

LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN WASHINGTON, D.C.

[ECHOSTAR LOGO]

[HUGHES LOGO]

FEBRUARY 2002

## THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of more than 500 identical channels. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY THE ONE MARKET IN WASHINGTON, D.C.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Washington, D.C., and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Washington, D.C. to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

CABLE FRANCHISE AREAS

---

WASHINGTON, D.C.

- - Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Washington, D.C.
- - About .1 million of the .2 million TV households in Washington, D.C. subscribe to a cable service, which equates to about 57% of all Washington, D.C. households.

[Map of Washington, D.C. with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

---

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

WASHINGTON, D.C.

- - Unlike most states in the U.S., the Washington, D.C. area has a competitive multi-channel alternative to cable -- WITH local channels.
- - Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- - DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- - In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in Washington, D.C. where DIRECTV and DISH Network began delivering local channels.

ECHOSTAR AND DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

- - But Washington, D.C. is one of the few lucky areas. 42 million TV households are not served with local channels by DBS. Residents in these markets do not have a true competitive alternative to cable.
- - Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- - Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the country's 210 local channel markets.

## SEC LEGEND

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN FLORIDA

[ECHOSTAR LOGO]

[HUGHES LOGO]

FEBRUARY 2002

## THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 11 MARKETS IN FLORIDA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Florida, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Florida to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

CABLE FRANCHISE AREAS

-----  
FLORIDA

- - Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Florida.
- - About 4.7 million of the 6.2 million TV households in Florida subscribe to a cable service, which equates to about 75% of all Florida households.

[Map of the state of Florida with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

FLORIDA

- - In Florida, only those DBS TV households within the Miami-Ft. Lauderdale, Orlando et al, Tampa-St. Pete et al, and W. Palm Beach-Ft. Pierce television markets have a fully competitive multi-channel alternative to cable -- WITH local channels.
- - Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- - DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- - In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the four markets in Florida in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Florida and certain surrounding states with portions in color and with the phrase "1,333,000 DBS Subscribers" written across it.]

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

FLORIDA

- - As shown by this map, Florida TV households outside the Miami-Ft. Lauderdale, Orlando et al, Tampa-St. Pete et al, and W. Palm Beach-Ft. Pierce television markets do not have a true competitive alternative to cable.
- - Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- - Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 11 local channel markets in Florida.

[Map of the state of Florida and certain surrounding states with portions in color and the phrase "7 TV Markets Unserved" written across it.]

ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- - The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- - The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- - The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]                      [110 degrees]                      [101 degrees]  
[Picture of satellite.]            [Picture of satellite.]            [Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative Channels Today"  
written across it.]

NATIONAL PRICING

---

- - Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- - For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

---

FLORIDA

- - Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- - This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- - The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- - Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Florida with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

FLORIDA

- - The merger will bridge the digital divide in Florida by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
  - - The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
  - - The merger will provide the technical and economic infrastructure to convert every household in Florida and the country to a digital "have."
- [Map of the state of Florida filled entirely with color.]

- - Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- - An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- - New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- - Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- - Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- - Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- - The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- - The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

## SEC Legend

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN GEORGIA

[ECHOSTAR LOGO]

[HUGHES LOGO]

FEBRUARY 2002

THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 11 MARKETS IN GEORGIA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Georgia, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Georgia to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

## SEC LEGEND

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER

LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN HAWAII

[ECHOSTAR LOGO]

[HUGHES LOGO]  
February 2002

## THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY THE ONE MARKET IN HAWAII.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Hawaii, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Hawaii to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

## CABLE FRANCHISE AREAS

### HAWAII

- - Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Hawaii.

- - About .3 million of the .4 million TV households in Hawaii subscribe to a cable service, which equates to about 88% of all Hawaii households.

[Map of the state of Hawaii with portions in color.]

#### LEGEND

[Colored box.] Cable Franchise Areas

4 THE ECHOSTAR/HUGHES MERGER

SOURCE: SKYRESEARCH, FEB. 2002

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

- - Today only 65 million TV households, those within the 42 television markets served by DIRECTV and DISH Network, have a fully competitive multi-channel alternative to cable -- with local channels.
- - Competitive alternatives to cable did not seriously take form until the launch of DIRECTV in 1994, later joined by DISH Network in 1996.
- - DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- - In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in those markets in which DIRECTV and DISH Network began delivering local channels.

65 MILLION HOUSEHOLDS

ECHOSTAR AND DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

HAWAII

- - As shown by this map, Hawaii TV households do not have a true competitive alternative to cable.
- - Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- - Neither DIRECTV nor DISH Network, alone, have sufficient spectrum, to provide any local channels to the one local market in Hawaii.

[Map of the state of Hawaii filled entirely with color and the phrase "1 TV Market Unserved" written across it.]

LEGEND

ECHOSTAR AND DIRECTV, JAN. 31, 2002

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

HAWAII

- - DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- - The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including the 1 market in Hawaii.

[Map of the state of Hawaii filled entirely with color and the phrase "1 Market Served" written across it.]

7 THE ECHOSTAR/HUGHES MERGER SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

- - The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- - The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- - The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]                      [110 degrees]                      [101 degrees]  
[Picture of satellite.]              [Picture of satellite.]              [Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative Channels Today" written across it.]

WITH MERGER: SPECTRUM EFFICIENCIES ACHIEVED

HAWAII

- - Implementation could begin immediately following merger approval, and the rollout can be completed as soon as 24 months later, allowing delivery of local channels to all .4 million TV households in Hawaii.

[119 degrees] [110 degrees] [101 degrees]

9 THE ECHOSTAR/HUGHES MERGER SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
ECHOSTAR, HUGHES, FEB. 2002

NATIONAL PRICING

- - Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- - For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

BROADBAND: THE DIGITAL "HAVE NOTS"

HAWAII

- - Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- - This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- - The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- - Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Hawaii with portions in color.]

11 THE ECHOSTAR/HUGHES MERGER

SOURCE: THE BUXTON COMPANY,  
"BROADBAND DEPLOYMENT," JAN. 2002

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

HAWAII

- - The merger will bridge the digital divide in Hawaii by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- - The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- - The merger will provide the technical and economic infrastructure to convert every household in Hawaii and the country to a digital "have."

[Map of the state of Hawaii filled entirely with color.]

12 THE ECHOSTAR/HUGHES MERGER

SOURCE: THE BUXTON COMPANY,  
"BROADBAND DEPLOYMENT," JAN. 2002

ONE NATION, ONE DISH

- - Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- - An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- - New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- - Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

- - Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- - Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- - The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- - The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

- - The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- - The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- - The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- - The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Hawaii and all Americans.

## SEC LEGEND

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. [HUGHES LOGO]

February 2002

## THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 5 MARKETS IN IDAHO.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

Continued...

...Continued

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Idaho, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Idaho to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

## CABLE FRANCHISE AREAS

### IDAHO

- - Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Idaho.
- - About .2 million of the .5 million TV households in Idaho subscribe to a cable service, which equates to about 50% of all Idaho households.

[Map of the state of Idaho with portions in color.]

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

- - The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- - The merger of EchoStar and HUGHES ensures that prices for video and data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- - The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- - The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Idaho and all Americans.

THE ECHOSTAR/HUGHES MERGER

- Local Channels, All Americans
- One Nation, One Rate Card
- Eliminates the "Digital Divide"

TRUE COMPETITION FOR 107 MILLION HOUSEHOLDS

## SEC LEGEND

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER

LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN ILLINOIS

[ECHOSTAR LOGO]

[HUGHES LOGO]

February 2002

## THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 10 MARKETS IN ILLINOIS.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

Continued...

...Continued

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Illinois, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Illinois to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

## CABLE FRANCHISE AREAS

### ILLINOIS

- - Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Illinois.
- - About 2.9 million of the 4.4 million TV households in Illinois subscribe to a cable service, which equates to about 65% of all Illinois households.

[Map of the state of Illinois with portions in color.]

#### LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

ILLINOIS

- - In Illinois, only those DBS TV households within the Chicago and St. Louis television markets have a fully competitive multi-channel alternative to cable -- WITH local channels.
- - Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- - DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- - In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the two markets in Illinois in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Illinois and certain surrounding states with portions in color and with the phrase "847,000 DBS Subscribers" written across it.]

EchoStar and DIRECTV, Jan. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

ILLINOIS

- - As shown by this map, Illinois TV households outside the Chicago and St. Louis television markets do not have a true competitive alternative to cable.
- - Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- - Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 10 local channel markets in Illinois.

[Map of the state of Illinois and certain surrounding states with portions in color and the phrase "8 TV Markets Unserved" written across it.]

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

ILLINOIS

- - DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- - The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 10 markets in Illinois.

[Map of the state of Illinois and certain surrounding states with portions in color and the phrase "All 10 Markets Served" written across it.]

LEGEND

[Colored box.] TV Households With Competitive Alternative After Merger

Source: Nielsen Media Research, Sept. 2001; EchoStar, HUGHES, Feb. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

- - The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- - The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- - The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

Source: Nielsen Media Research, Sept. 2001; EchoStar, HUGHES, Feb. 2002

## NATIONAL PRICING

- - Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- - For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

## BROADBAND: THE DIGITAL "HAVE NOTS"

### ILLINOIS

- - Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today
- - This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- - The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- - Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly- priced, bundled video and high-speed data services.

[Map of the state of Illinois with portions in color.]

#### LEGEND

[Colored box.] Households Without Broadband Access

Source: The Buxton Company, "Broadband Deployment," Jan. 2002

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

ILLINOIS

- - The merger will bridge the digital divide in Illinois by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- - The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- - The merger will provide the technical and economic infrastructure to convert every household in Illinois and the country to a digital "have."

[Map of the state of Illinois filled entirely with color.]

Source: The Buxton Company, "Broadband Deployment," Jan. 2002

ONE NATION, ONE DISH

- - Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- - An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- - New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- - Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

Source: EchoStar, HUGHES, Feb. 2002

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

- - Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- - Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- - The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- - The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

TRUE COMPETITION FOR 107 MILLION HOUSEHOLDS

## SEC LEGEND

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. - - Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today
- - This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- - The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- - Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly- priced, bundled video and high-speed data services.

[Map of the state of Indiana with portions in color.]

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

INDIANA

- - The merger will bridge the digital divide in Indiana by providing consumers in every community with a competitively priced high- speed "broadband solution" available to them regardless of their location.
- - The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- - The merger will provide the technical and economic infrastructure to convert every household in Indiana and the country to a digital "have."

[Map of the state of Indiana filled entirely with color.]

"Broadband Deployment,"  
Jan. 2002

ONE NATION, ONE DISH

- - Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- - An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- - New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- - Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

## CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

- - Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- - Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- - The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- - The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

### LEGEND

- 14 The EchoStar/HUGHES Merger Source: FCC Eighth Annual Report, "Annual Assessment of the Status of Competition in the Market for the Delivery of Video Programming," Jan. 14, 2002, pp. 11, 87; EchoStar and DIRECTV, Jan. 31, 2002; "Report on Cable Industry Prices," Federal Communications Commission, Feb. 14, 2001, p. 9, and Dec. 15, 1997, p. 7

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

- - The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- - The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- - The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- - The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Indiana and all Americans.

- Eliminates the "Digital Divide"

TRUE COMPETITION FOR 107 MILLION HOUSEHOLDS

## SEC LEGEND

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN IOWA

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

February 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 10 MARKETS IN IOWA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Iowa, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Iowa to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

CABLE FRANCHISE AREAS

---

IOWA

- - Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Iowa.
- - About .7 million of the 1.1 million TV households in Iowa subscribe to a cable service, which equates to about 64% of all Iowa households.

[Map of the state of Iowa with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

- - Today only 65 million TV households, those within the 42 television markets served by DIRECTV and DISH Network, have a fully competitive multi-channel alternative to cable -- with local channels.
- - Competitive alternatives to cable did not seriously take form until the launch of DIRECTV in 1994, later joined by DISH Network in 1996.
- - DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- - In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in those markets in which DIRECTV and DISH Network began delivering local channels.

65 MILLION HOUSEHOLDS

JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

[IOWA]

- - As shown by this map, Iowa TV households do not have a true competitive alternative to cable.
- - Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- - Neither DIRECTV nor DISH Network, alone, have sufficient spectrum to provide any local channels to any of the 10 local markets in Iowa.

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

[IOWA]

- - DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- - The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 10 markets in Iowa.

[Map of the state of Iowa and certain surrounding states with portions in color and the phrase "All 10 Markets Served" written across it.]

2001; ECHOSTAR, HUGHES,  
FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- - The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- - The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- - The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]                      [110 degrees]                      [101 degrees]  
[Picture of satellite.]      [Picture of satellite.]      [Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative Channels Today"  
written across it.]

[IOWA]

- - Implementation could begin immediately following merger approval, and the rollout can be completed as soon as 24 months later, allowing delivery of local channels to all 1.1 million TV households in Iowa.

NATIONAL PRICING

---

- - Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- - For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

[IOWA]

- - Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- - This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- - The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- - Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Iowa with portions in color.]

LEGEND  
[Colored box.] Households Without Broadband Access

[IOWA]

- - The merger will bridge the digital divide in Iowa by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- - The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- - The merger will provide the technical and economic infrastructure to convert every household in Iowa and the country to a digital "have."

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

KANSAS

- - DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- - The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 8 markets in Kansas.

[Map of the state of Kansas and certain surrounding states with portions in color and the phrase "All 8 Markets Served" written across it.]

ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- - The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- - The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- - The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]

[Picture of satellite.]

[110 degrees]

[Picture of satellite.]

[101 degrees]

[Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative Channels Today" written across it.]

KANSAS

- - Implementation could begin immediately following merger approval, and the rollout can be completed as soon as 24 months later, allowing delivery of local channels to all 1 million TV households in Kansas.

[119 degrees]                      [110 degrees]                      [101 degrees]

LEGEND  
[Colored box.] DBS Households Served by Local Channels After Merger

NATIONAL PRICING

---

- - Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- - For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

KANSAS

- - Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- - This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- - The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- - Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Kansas with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

KANSAS

- - The merger will bridge the digital divide in Kansas by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- - The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- - The merger will provide the technical and economic infrastructure to convert every household in Kansas and the country to a digital "have."

[Map of the state of Kansas filled entirely with color.]

ONE NATION, ONE DISH

---

- - Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- - An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- - New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- - Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirecTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- - Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- - Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- - The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- - The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

TRUE COMPETITION FOR 107 MILLION HOUSEHOLDS

---

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN KENTUCKY

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

February 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 10 MARKETS IN KENTUCKY.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed A TECHNICALLY AND COMMERCIALY FEASIBLE plan to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Kentucky, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Kentucky to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

KENTUCKY

- - Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Kentucky.
- - About 1.0 million of the 1.5 million TV households in Kentucky subscribe to a cable service, which equates to about 66% of all Illinois households.

[Map of the state of Kentucky with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

KENTUCKY

- - In Kentucky, only those DBS TV households within the Cincinnati and Nashville television markets have a fully competitive multi-channel alternative to cable --WITH local channels.
- - Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- - DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- - In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the two markets in Kentucky in which DIRECTV and DISH Network began delivering local channels.

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

KENTUCKY

- - As shown by this map, Kentucky TV households outside the Cincinnati and Nashville television markets do not have a true competitive alternative to cable.
- - Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- - Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 10 local channel markets in Kentucky.

SEC LEGEND

-----

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

- - Today only 65 million TV households, those within the 42 television markets served by DIRECTV and DISH Network, have a fully competitive multi-channel alternative to cable -- WITH local channels.
- - Competitive alternatives to cable did not seriously take form until the launch of DIRECTV in 1994, later joined by DISH Network in 1996.
- - DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- - In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in those markets in which DIRECTV and DISH Network began delivering local channels.

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

[LOUISIANA]

- - As shown by this map, Louisiana TV households do not have a true competitive alternative to cable.
- - Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- - Neither DIRECTV nor DISH Network, alone, have sufficient spectrum to provide any local channels to any of the 8 local markets in Louisiana.

[Map of the state of Louisiana and certain surrounding areas with portions in color and the phrase "8 TV Markets Unserved" written across it.]

LEGEND

[Colored box.] Households With No Competitive Alternative Today

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

[LOUISIANA]

- - DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- - The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 8 markets in Louisiana.

[Map of the state of Louisiana and certain surrounding states with portions in color and the phrase "All 8 Markets Served" written across it.]

FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- - The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- - The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- - The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]                      [110 degrees]                      [101 degrees]  
[Picture of satellite.]            [Picture of satellite.]            [Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative Channels Today"  
written across it.]

[LOUISIANA]

- - Implementation could begin immediately following merger approval, and the rollout can be completed as soon as 24 months later, allowing delivery of local channels to all 1.6 million TV households in Louisiana.

[119 degrees]                      [110 degrees]                      [101 degrees]

LEGEND

[Colored box.] DBS Households Served by Local Channels After Merger

NATIONAL PRICING

---

- - Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- - For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

[LOUISIANA]

- - Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- - This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- - The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- - Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Louisiana with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

-----  
[LOUISIANA]

- - The merger will bridge the digital divide in Louisiana by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- - The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- - The merger will provide the technical and economic infrastructure to convert every household in Louisiana and the country to a digital "have."

[Map of the state of Louisiana filled entirely with color.]

ONE NATION, ONE DISH

---

- - Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- - An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- - New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- - Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirecTV satellite dish on the side of a house.]

---

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- - Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- - Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- - The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- - The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. THE ECHOSTAR/HUGHES MERGER

LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN MAINE

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

February 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 3 MARKETS IN MAINE.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Maine, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Maine to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

CABLE FRANCHISE AREAS

---

[MAINE]

- - Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Maine.
- - About .3 million of the .5 million TV households in Maine subscribe to a cable service, which equates to about 70% of all Maine households.

[Map of the state of Maine with portions in color.]

THE ECHOSTAR/HUGHES MERGER

LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN MARYLAND

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 4 MARKETS IN MARYLAND.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

---

...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Maryland, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Maryland to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

---

CABLE FRANCHISE AREAS

---

MARYLAND

- - Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Maryland.
- - About 1.3 million of the 2.0 million TV households in Maryland subscribe to a cable service, which equates to about 70% of all Maryland households.

[Map of the state of Maryland with portions in color.]

LEGEND

[Colored box.] - Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

MARYLAND

- - In Maryland, only those DBS TV households within the Baltimore, Pittsburgh and Washington, D.C. television markets have a fully competitive multi-channel alternative to cable -- WITH local channels.
- - Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- - DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception; consumers were not able to receive their local channels via satellite.
- - In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the three markets in Maryland in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Maryland and certain surrounding states with portions in color and with the phrase "334,000 DBS Subscribers" written across it.]

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

MARYLAND

- - As shown by this map, Maryland TV households outside the Baltimore, Pittsburgh and Washington, D.C. television markets do not have a true competitive alternative to cable.
- - Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- - Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 4 local channel markets in Maryland.

[Map of the state of Maryland and certain surrounding states with portions in color and the phrase "1 TV Market Unserved" written across it.]

LEGEND

[Colored box.] - DBS Households Served by Local Channels After Merger

NATIONAL PRICING

---

- - Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- - For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

MARYLAND

- - Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- - This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- - The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- - Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Maryland with portions in color.]

LEGEND

[Colored box.] - Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

MARYLAND

- - The merger will bridge the digital divide in Maryland by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- - The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- - The merger will provide the technical and economic infrastructure to convert every household in Maryland and the country to a digital "have."

[Map of the state of Maryland filled entirely with color.]

ONE NATION, ONE DISH

---

- - Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- - An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- - New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- - Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- - Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- - Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- - The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- - The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

SEC LEGEND

-----  
In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. THE ECHOSTAR/HUGHES MERGER

LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN MASSACHUSETTS

[ECHOSTAR LOGO]

[HUGHES LOGO]

-----  
FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 4 MARKETS IN MASSACHUSETTS.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Massachusetts, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Massachusetts to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

FEBRUARY 2002

THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 11 MARKETS IN MICHIGAN.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Michigan, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Michigan to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

---

MICHIGAN

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Michigan.
- o About 2.4 million of the 3.7 million TV households in Michigan subscribe to a cable service, which equates to about 66% of all Michigan households.

[Map of the state of Michigan with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

MICHIGAN

- o In Michigan, only those DBS TV households within the Detroit television market have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the one market in Michigan in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Michigan and certain surrounding states with portions in color and with the phrase "749,000 DBS Subscribers" written across it.]

ECHOSTAR AND DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

-----

Michigan

- o As shown by this map, Michigan TV households outside the Detroit television market do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 11 local channel markets in Michigan.

[Map of the state of Michigan and certain surrounding states with portions in color and the phrase "10 TV Markets Unserved" written across it.]

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

MICHIGAN

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 11 markets in Michigan.

[Map of the state of Michigan and certain surrounding states with portions in color and the phrase "All 11 Markets Served" written across it.]

ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

-----

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

ECHOSTAR, HUGHES, FEB. 2002

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

BROADBAND: THE DIGITAL "HAVE NOTS"

-----

MICHIGAN

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly- priced, bundled video and high-speed data services.

[Map of the state of Michigan with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

-----

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

MICHIGAN

- o The merger will bridge the digital divide in Michigan by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Michigan and the country to a digital "have."

[Map of the state of Michigan filled entirely with color.]

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirecTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

---

- o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Michigan and all Americans.

SEC LEGEND

-----

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. FEBRUARY 2002

THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 7 MARKETS IN MINNESOTA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

---

- o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers-- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Minnesota and all Americans.

SEC LEGEND

---

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN MISSISSIPPI

[ECHOSTAR LOGO]

[HUGHES LOGO]

-----  
FEBRUARY 2002

THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 10 MARKETS IN MISSISSIPPI.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Mississippi, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Mississippi to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

---

MISSISSIPPI

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Mississippi.
- o About .6 million of the 1 million TV households in Mississippi subscribe to a cable service, which equates to about 61% of all Mississippi households.

[Map of the state of Mississippi with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

MISSISSIPPI

- o In Mississippi, only those DBS TV households within the Memphis television market have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the one market in Mississippi in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Mississippi and certain surrounding states with portions in color and with the phrase "339,000 DBS Subscribers" written across it.]

DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

MISSISSIPPI

- o As shown by this map, Mississippi TV households outside the Memphis television market do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 10 local channel markets in Mississippi.

[Map of the state of Mississippi and certain surrounding states with portions in color and the phrase "9 TV Markets Unserved" written across it.]

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

MISSISSIPPI

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 10 markets in Mississippi.

[Map of the state of Mississippi and certain surrounding states with portions in color and the phrase "All 10 Markets Served" written across it.]

---

7 THE ECHOSTAR/HUGHES MERGER SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

ECHOSTAR, HUGHES, FEB. 2002

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

---

BROADBAND: THE DIGITAL "HAVE NOTS"

---

MISSISSIPPI

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Mississippi with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

MISSISSIPPI

- o The merger will bridge the digital divide in Mississippi by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Mississippi and the country to a digital "have."

[Map of the state of Mississippi filled entirely with color.]

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirecTV satellite dish on the side of a house.]

---

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

TRUE COMPETITION FOR 107 MILLION HOUSEHOLDS

---

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. FEBRUARY 2002

THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 13 MARKETS IN MISSOURI.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

[Map of the United States with the phrase "Over 500 Duplicative Channels Today" written across it.]

-----

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

---

BROADBAND: THE DIGITAL "HAVE NOTS"

---

MISSOURI

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Missouri with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

MISSOURI

- o The merger will bridge the digital divide in Missouri by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Missouri and the country to a digital "have."

[Map of the state of Missouri filled entirely with color.]

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

---

- o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers-- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Missouri and all Americans.

SEC LEGEND

-----

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. THE ECHOSTAR/HUGHES MERGER

LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN MONTANA

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

THE BENEFITS OF THE EHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 9 MARKETS IN MONTANA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

2 THE EHOSTAR/HUGHES MERGER

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Montana, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Montana to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

MONTANA

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Montana.
- o About .2 million of the .3 million TV households in Montana subscribe to a cable service, which equates to about 53% of all Montana households.

[Map of the state of Montana with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

- o Today only 65 million TV households, those within the 42 television markets served by DIRECTV and DISH Network, have a fully competitive multi-channel alternative to cable -- with local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in those markets in which DIRECTV and DISH Network began delivering local channels.

ECHOSTAR AND DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

MONTANA

- o As shown by this map, Montana TV households do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network, alone, have sufficient spectrum to provide any local channels to any of the 9 local markets in Montana.

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

MONTANA

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 9 markets in Montana.

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

TRUE COMPETITION FOR 107 MILLION HOUSEHOLDS

---

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. CABLE FRANCHISE AREAS

---

NEBRASKA

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Nebraska.
  
- o About .5 million of the .6 million TV households in Nebraska subscribe to a cable service, which equates to about 70% of all Nebraska households.

[Map of the state of Nebraska with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

NEBRASKA

- o In Nebraska, only those DBS TV households within the Denver television market have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the one market in Nebraska in which DIRECTV and DISH Network began delivering local channels.

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

-----

NEBRASKA

- o As shown by this map, Nebraska TV households outside the Denver television market do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 9 local channel markets in Nebraska.

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

NEBRASKA

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 9 markets in Nebraska.

[Map of the state of Nebraska and certain surrounding states with portions in color and the phrase "All 9 Markets Served" written across it.]

SOURCE: NIELSEN MEDIA RESEARCH, SEPT.  
2001; ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

-----

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase  
"One Nation, One Rate Card" written across it.]

---

BROADBAND: THE DIGITAL "HAVE NOTS"

---

NEBRASKA

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Nebraska with portions in color]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

NEBRASKA

- o The merger will bridge the digital divide in Nebraska by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Nebraska and the country to a digital "have."

[Map of the state of Nebraska filled entirely with color.]

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV  
satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

---

- o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Nebraska and all Americans.

SEC LEGEND

-----  
In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN NEVADA

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

THE BENEFITS OF THE EHOSTAR/HUGHES MERGER

---

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 3 MARKETS IN NEVADA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Nevada, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Nevada to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

---

NEVADA

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Nevada.
- o About .5 million of the .8 million TV households in Nevada subscribe to a cable service, which equates to about 70% of all Nevada households.

[Map of the state of Nevada with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

NEVADA

- o In Nevada, only those DBS TV households within the Salt Lake City television market have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the one market in Nevada in which DIRECTV and DISH Network began delivering local channels.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN NEW HAMPSHIRE

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 3 MARKETS IN NEW HAMPSHIRE.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in New Hampshire, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in New Hampshire to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

NEW HAMPSHIRE

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across New Hampshire.
- o About .4 million of the .5 million TV households in New Hampshire subscribe to a cable service, which equates to about 81% of all New Hampshire households.

[Map of the State of New Hampshire with portions in color.]

LEGEND  
[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

NEW HAMPSHIRE

- o In New Hampshire, only those DBS TV households within the Boston television market have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the one market in New Hampshire in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of New Hampshire and certain surrounding states with portions in color and with the phrase "81,000 DBS Subscribers" written across it.]

DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

NEW HAMPSHIRE

- o As shown by this map, New Hampshire TV households outside the Boston television market do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 3 local channel markets in New Hampshire.

[Map of the state of New Hampshire and certain surrounding states with portions in color and the phrase "2 TV Markets Unserved" written across it.]

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

NEW HAMPSHIRE

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 3 markets in New Hampshire.

[Map of the state of New Hampshire and certain surrounding states with portions in color and the phrase "All 3 Markets Served" written across it.]

7 THE ECHOSTAR/HUGHES MERGER

SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

-----

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]                      [110 degrees]                      [101 degrees]  
[Picture of Satellite.]            [Picture of satellite.]            [Picture of satellite.]

[Map of the United States with the Phrase "Over 500 Duplicative Channels Today" written across it.]

-----

NATIONAL PRICING

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

BROADBAND: THE DIGITAL "HAVE NOTS"

NEW HAMPSHIRE

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of New Hampshire with portions in color.]

LEGEND  
[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

NEW HAMPSHIRE

- o The merger will bridge the digital divide in New Hampshire by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in New Hampshire and the country to a digital "have."

[Map of the state of New Hampshire filled entirely with color.]

---

12 THE ECHOSTAR/HUGHES MERGER

SOURCE: THE BUXTON COMPANY,  
"BROADBAND DEPLOYMENT,"  
JAN. 2002

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

---

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN NEW JERSEY

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 2 MARKETS IN NEW JERSEY.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

TRUE COMPETITION FOR 107 MILLION HOUSEHOLDS

---

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN NEW MEXICO

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 4 MARKETS IN NEW MEXICO.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in New Mexico, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in New Mexico to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

---

NEW MEXICO

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across New Mexico.
- o About .4 million of the .6 million TV households in New Mexico subscribe to a cable service, which equates to about 58% of all New Mexico households.

[Map of the state of New Mexico with portions in color.]

LEGEND  
[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

NEW MEXICO

- o In New Mexico, only those DBS TV households within the Albuquerque-Santa Fe television market have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the one market in New Mexico in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of New Mexico and certain surrounding states with portions in color and with the phrase "168,000 DBS Subscribers" written across it.]

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

NEW MEXICO

- o As shown by this map, New Mexico TV households outside the Albuquerque-Santa Fe television market do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 4 local channel markets in New Mexico.

[Map of the state of New Mexico and certain surrounding states with portions in color and with the phrase "3 TV Markets Unserved" written across it.]

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

NEW MEXICO

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 4 markets in New Mexico.

[Map of the state of New Mexico and certain surrounding states with portions in color and the phrase "All 4 Markets Served" written across it.]

FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

---

BROADBAND: THE DIGITAL "HAVE NOTS"

---

NEW MEXICO

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

NEW MEXICO

- o The merger will bridge the digital divide in New Mexico by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in New Mexico and the country to a digital "have."

[Map of the state of New Mexico filled entirely with color.]

SOURCE: THE BUXTON COMPANY,  
"BROADBAND DEPLOYMENT,"  
JAN. 2002

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

---

- o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of New Mexico and all Americans.

SEC LEGEND

-----

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of New York and certain surrounding states  
with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

NEW YORK

- o The merger will bridge the digital divide in New York by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in New York and the country to a digital "have."

[Map of the state of New York filled entirely with color.]

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish  
on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

SEC LEGEND

-----  
In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN NORTH CAROLINA

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 11 MARKETS IN NORTH CAROLINA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in North Carolina, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in North Carolina to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

---

NORTH CAROLINA

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across North Carolina.
- o About 1.9 million of the 3 million TV households in North Carolina subscribe to a cable service, which equates to about 65% of all North Carolina households.

[Map of the state of North Carolina with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

NORTH CAROLINA

- o In North Carolina, only those DBS TV households within the Atlanta, Charlotte, Greensboro et al, Greenville et al and Raleigh-Durham television markets have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the five markets in North Carolina in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of North Carolina and certain surrounding states with portions in color and with the phrase "872,000 DBS Subscribers" written across it.]

SKYRESEARCH, FEB. 2002; ECHOSTAR  
AND DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

NORTH CAROLINA

- o As shown by this map, North Carolina TV households outside the Atlanta, Charlotte, Greensboro et al, Greenville et al and Raleigh-Durham television markets do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 11 local channel markets in North Carolina.

[Map of the state of North Carolina and certain surrounding states with portions in color and the phrase "6 TV Markets Unserved" written across it.]

DIRECTV, JAN. 31, 2002

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

NORTH CAROLINA

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 11 markets in North Carolina.

[Map of the state of North Carolina and certain surrounding states with portions in color and the phrase "All 11 Markets Served" written across it.]

7 THE ECHOSTAR/HUGHES MERGER SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

ECHOSTAR, HUGHES, FEB. 2002

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation,  
One Rate Card" written across it.]

---

NORTH CAROLINA

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

SEC LEGEND

---

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN NORTH DAKOTA

[ECHOSTAR LOGO]

[HUGHES LOGO]

-----  
FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 2 MARKETS IN NORTH DAKOTA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in North Dakota, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in North Dakota to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

NORTH DAKOTA

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
  
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 2 markets in North Dakota.

[Map of the state of North Dakota and certain surrounding areas with portions in color and the phrase "All 2 Markets Served" written across it.]

SEPT. 2001; ECHOSTAR,  
HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees.]

WITH MERGER: SPECTRUM EFFICIENCIES ACHIEVED

---

NORTH DAKOTA

o Implementation could begin immediately following merger approval, and the rollout can be completed as soon as 24 months later, allowing delivery of local channels to all .25 million TV households in North Dakota.

[119 degrees.]                      [110 degrees.]                      [101 degrees.]

SEPT. 2001; ECHOSTAR,  
HUGHES, FEB. 2002

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

---

BROADBAND: THE DIGITAL "HAVE NOTS"

---

NORTH DAKOTA

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of North Dakota with portions in color.]

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

NORTH DAKOTA

- o The merger will bridge the digital divide in North Dakota by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in North Dakota and the country to a digital "have."

"BROADBAND DEPLOYMENT,"  
JAN. 2002

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

---

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

SEC LEGEND

-----

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. February 2002

THE BENEFITS OF THE EHOSTAR/HUGHES MERGER

---

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 12 MARKETS IN OHIO.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

2 THE EHOSTAR/HUGHES MERGER

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Ohio, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Ohio to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

OHIO

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Ohio.
- o About 3 million of the 4.3 million TV households in Ohio subscribe to a cable service, which equates to about 70% of all Ohio households.

[Map of the state of Ohio with portions in color]

LEGEND

[Colored box.]

Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

OHIO

- o In Ohio, only those DBS TV households within the Cincinnati, Cleveland and Columbus television markets have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the three markets in Ohio in which DIRECTV and DISH Network began delivering local channels.

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

OHIO

- o As shown by this map, Ohio TV households outside the Cincinnati, Cleveland and Columbus television markets do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 12 local channel markets in Ohio.

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Oklahoma, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Oklahoma to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

---

OKLAHOMA

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Oklahoma.
- o About .8 million of the 1.3 million TV households in Oklahoma subscribe to a cable service, which equates to about 61% of all Oklahoma households.

[Map of the state of Oklahoma with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

---

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

- o Today only 65 million TV households, those within the 42 television markets served by DIRECTV and DISH Network, have a fully competitive multi-channel alternative to cable -- with local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in those markets in which DIRECTV and DISH Network began delivering local channels.

[Map of the United States with portions in color and with the phrase "65 Million Households" written across it.]

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

OKLAHOMA

- o As shown by this map, Oklahoma TV households do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network, alone, have sufficient spectrum to provide any local channels to any of the 8 local markets in Oklahoma.

[Map of the state of Oklahoma and certain surrounding states with portions in color and the phrase "8 TV Markets Unserved" written across it.]

LEGEND

AND DIRECTV, JAN. 31, 2002

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

OKLAHOMA

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 8 markets in Oklahoma.

[Map of the state of Oklahoma and certain surrounding states with portions in color and the phrase "All 8 Markets Served" written across it.]

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees.]                      [110 degrees.]                      [101 degrees.]  
[Picture of satellite.]              [Picture of satellite.]              [Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative Channels Today" written across it.]

WITH MERGER: SPECTRUM EFFICIENCIES ACHIEVED

OKLAHOMA

- o Implementation could begin immediately following merger approval, and the rollout can be completed as soon as 24 months later, allowing delivery of local channels to all 1.3 million TV households in Oklahoma.

[119 degrees.]                      [110 degrees.]                      [101 degrees.]

LEGEND

[Colored box.] DBS Households Served by Local Channels After Merger

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

---

BROADBAND: THE DIGITAL "HAVE NOTS"

---

OKLAHOMA

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Oklahoma with portions in color.]

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

OKLAHOMA

- o The merger will bridge the digital divide in Oklahoma by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Oklahoma and the country to a digital "have."

[Map of the state of Oklahoma filled entirely with color.]

---

12 THE ECHOSTAR/HUGHES MERGER

SOURCE: THE BUXTON COMPANY,  
"BROADBAND DEPLOYMENT,"  
JAN. 2002

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

SEC LEGEND

-----  
In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN OREGON

[ECHOSTAR LOGO]

[HUGHES LOGO]

-----  
FEBRUARY 2002

-----  
February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 7 MARKETS IN OREGON.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Oregon, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Oregon to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN PENNSYLVANIA

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 11 MARKETS IN PENNSYLVANIA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Pennsylvania, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Pennsylvania to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

---

PENNSYLVANIA

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Pennsylvania.
- o About 3.5 million of the 4.6 million TV households in Pennsylvania subscribe to a cable service, which equates to about 78% of all Pennsylvania households.

[Map of the state of Pennsylvania with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

PENNSYLVANIA

- o In Pennsylvania, only those DBS TV households within the New York, Philadelphia, Pittsburgh and Washington, D.C. television markets have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the four markets in Pennsylvania in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Pennsylvania and certain surrounding states with portions in color and with the phrase "608,000 DBS Subscribers" written across it.]

SKYRESEARCH, FEB. 2002; ECHOSTAR  
AND DIRECTV, JAN. 31, 2002

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

-----

PENNSYLVANIA

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 11 markets in Pennsylvania.

[Map of the state of Pennsylvania and certain surrounding states with portions in color and the phrase "All 11 Markets Served" written across it.]

-----

7 THE ECHOSTAR/HUGHES MERGER SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]

[Picture of satellite.]

[110 degrees]

[Picture of satellite.]

[101 degrees]

[Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative Channels Today" written across it.]

NATIONAL PRICING

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

PENNSYLVANIA

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Pennsylvania with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

PENNSYLVANIA

- o The merger will bridge the digital divide in Pennsylvania by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Pennsylvania and the country to a digital "have."

[Map of the state of Pennsylvania filled entirely with color.]

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish  
on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

---

- o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Pennsylvania and all Americans.

SEC LEGEND

-----  
In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. CABLE FRANCHISE AREAS

---

RHODE ISLAND

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Rhode Island.
- o About .3 million of the .4 million TV households in Rhode Island subscribe to a cable service, which equates to about 76% of all Rhode Island households.

[Map of the state of Rhode Island with portions in color.]

LEGEND  
[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

- o Today only 65 million TV households, those within the 42 television markets served by DIRECTV and DISH Network, have a fully competitive multi-channel alternative to cable -- with local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in those markets in which DIRECTV and DISH Network began delivering local channels.

SEC LEGEND

-----

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER

LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN SOUTH CAROLINA

[ECHOSTAR LOGO]

[HUGHES LOGO]

-----  
FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 7 MARKETS IN SOUTH CAROLINA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in South Carolina, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in South Carolina to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

---

SOUTH CAROLINA

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across South Carolina.
- o About .9 million of the 1.5 million TV households in South Carolina subscribe to a cable service, which equates to about 63% of all South Carolina households.

[Map of the state of South Carolina with portions in color.]

LEGEND  
[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

SOUTH CAROLINA

- o In South Carolina, only those DBS TV households within the Charlotte and Greenville et al television markets have a fully competitive multi-channel alternative to cable -- with local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the two markets in South Carolina in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of South Carolina and certain surrounding states with portions in color and with the phrase "389,000 DBS Subscribers" written across it.]

LEGEND

SKYRESEARCH, FEB. 2002; ECHOSTAR  
AND DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

SOUTH CAROLINA

- o As shown by this map, South Carolina TV households outside the Charlotte and Greenville et al television markets do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 7 local channel markets in South Carolina.

[Map of the state of South Carolina and certain surrounding states with portions in color and the phrase "5 TV Markets Unserved" written across it.]

SKYRESEARCH, FEB. 2002; ECHOSTAR  
AND DIRECTV, JAN. 31, 2002

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

SOUTH CAROLINA

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 7 markets in South Carolina.

[Map of the state of South Carolina and certain surrounding states with portions in color and the phrase "All 7 Markets Served" written across it.]

7 THE ECHOSTAR/HUGHES MERGER

SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]                      [110 degrees]                      [101 degrees]  
[Picture of satellite.]            [Picture of satellite.]            [Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative Channels Today" written across it.]

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

SOUTH CAROLINA

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of South Carolina with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

---

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

SOUTH CAROLINA

- o The merger will bridge the digital divide in South Carolina by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in South Carolina and the country to a digital "have."

[Map of the state of South Carolina filled entirely with color.]

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirecTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

---

- o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of South Carolina and all Americans.

SEC LEGEND

-----

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. - o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirecTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

---

- o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of South Dakota and all Americans.

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN TENNESSEE

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

-----  
February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 8 MARKETS IN TENNESSEE.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Tennessee, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Tennessee to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

CABLE FRANCHISE AREAS

---

TENNESSEE

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Tennessee.
- o About 1.4 million of the 2.1 million TV households in Tennessee subscribe to a cable service, which equates to about 66% of all Tennessee households.

[Map of the state of Tennessee with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

TENNESSEE

- o In Tennessee, only those DBS TV households within the Memphis and Nashville television markets have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV((R)) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the two markets in Tennessee in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Tennessee and certain surrounding states with portions in color and with the phrase "559,000 DBS Subscribers" written across it.]

AND DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

TENNESSEE

- o As shown by this map, Tennessee TV households outside the Memphis and Nashville television markets do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 8 local channel markets in Tennessee.

[Map of the state of Tennessee and certain surrounding states with portions in color and the phrase "6 TV Markets Unserved" written across it.]

SKYRESEARCH, FEB. 2002; ECHOSTAR  
AND DIRECTV, JAN. 31, 2002

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

TENNESSEE

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 8 markets in Tennessee.

[Map of the state of Tennessee and certain surrounding states with portions in color and the phrase "All 8 Markets Served" written across it.]

---

7 THE ECHOSTAR/HUGHES MERGER SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]                      [110 degrees]                      [101 degrees]  
[Picture of satellite.]      [Picture of satellite.]      [Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative  
Channels Today" written across it.]

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase  
"One Nation, One Rate Card" written across it.]

TENNESSEE

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly- priced, bundled video and high-speed data services.

[Map of the state of Tennessee with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

TENNESSEE

- o The merger will bridge the digital divide in Tennessee by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Tennessee and the country to a digital "have."

[Map of the state of Tennessee filled entirely with color.]

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a  
DirecTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

2001; ECHOSTAR, HUGHES, FEB.  
2002

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

---

TEXAS

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly- priced, bundled video and high-speed data services.

[Map of the state of Texas with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

TEXAS

- o The merger will bridge the digital divide in Texas by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Texas and the country to a digital "have."

[Map of the state of Texas filled entirely with color.]

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

---

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

DIRECTV, JAN. 31, 2002;  
"REPORT ON CABLE INDUSTRY  
PRICES," FEDERAL COMMUNICATIONS  
COMMISSION, FEB. 14, 2001,  
P. 9, AND DEC. 15, 1997, P. 7

- o The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- o The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- o The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- o The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Texas and all Americans.

SEC LEGEND

-----

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN UTAH

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY THE ONE MARKET IN UTAH.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Utah, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Utah to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

CABLE FRANCHISE AREAS

UTAH

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Utah.
- o About .4 million of the .7 million TV households in Utah subscribe to a cable service, which equates to about 52% of all Utah households.

[Map of the state of Utah with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

UTAH

- o Unlike most states in the U.S., Utah has a competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in Utah where DIRECTV and DISH Network began delivering local channels.

[Map of the state of Utah and certain surrounding states with portions in color and with the phrase "212,000 DBS Subscribers" written across it.]

LEGEND

[Colored box.] Households With Access to DBS With Local Channels

5 THE ECHOSTAR/HUGHES MERGER SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
SKYRESEARCH, FEB. 2002; ECHOSTAR AND  
DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

---

- o But Utah is one of the few lucky states. 42 million TV households are not served with local channels by DBS. Residents in these markets do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the country's 210 local channel markets.

[Map of the United States with portions in color and the phrase "42 Million TV Households Unserved" written across it.]

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

- o DIRECTV and DISH Network engineering teams have developed a system that is technologically feasible and economically viable for the merged company to deliver full local broadcast service, in all 210 television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market in the country, including Alaska and Hawaii.

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

-----  
February 2002

## THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 3 MARKETS IN VERMONT.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001; SKYRESEARCH, FEB. 2002; ECHOSTAR AND DIRECTV, JAN. 31, 2002

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

VERMONT

- - DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- - The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 3 markets in Vermont.

[Map of the state of Vermont and certain surrounding states with portions in color and the phrase "All 3 Markets Served" written across it.]

LEGEND

[Colored box.] TV Households With Competitive Alternative After Merger

7 THE ECHOSTAR/HUGHES MERGER SOURCE: NIELSEN MEDIA RESEARCH,  
SEPT. 2001; ECHOSTAR, HUGHES,  
FEB. 2002

## NATIONAL PRICING

- - Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- - For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

BROADBAND: THE DIGITAL "HAVE NOTS"

VERMONT

- - Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- - This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- - The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- - Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Vermont with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

- 11 The EchoStar/HUGHES Merger      Source: The Buxton Company, "Broadband Deployment," Jan. 2002

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

VERMONT

- - The merger will bridge the digital divide in Vermont by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- - The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- - The merger will provide the technical and economic infrastructure to convert every household in Vermont and the country to a digital "have."

[Map of the state of Vermont filled entirely with color.]

12 The EchoStar/HUGHES Merger      Source: The Buxton Company, "Broadband Deployment," Jan. 2002

ONE NATION, ONE DISH

- - Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- - An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- - New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- - Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

- - Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- - Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- - The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- - The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

LOCAL CHANNELS AND BROADBAND FOR ALL AMERICANS

- - The merger of spectrum at the three orbital slots eliminates these disadvantages through the addition of an enhanced satellite infrastructure that will enable delivery of local channels in EVERY one of the 210 television markets across the country.
- - The merger of EchoStar and HUGHES ensures that prices for video AND data services will be the same throughout the country, whether the market is rural or urban/suburban: "one nation, one rate card."
- - The merged company will bridge the "digital divide" by moving satellite high-speed Internet access from its current high-priced niche to being price-competitive with existing providers -- a tremendous benefit for rural customers where DSL and cable modem service are unlikely to be available for years to come.
- - The EchoStar and HUGHES merger merits broad scale support for the clear and definitive benefits it will bring the residents of Vermont and all Americans.

- Eliminates the "Digital Divide"

TRUE COMPETITION FOR 107 MILLION HOUSEHOLDS

16 The EchoStar/HUGHES Merger

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN VIRGINIA

[ECHOSTAR LOGO]

[HUGHES LOGO]

February 2002

## THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 10 MARKETS IN VIRGINIA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Virginia, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Virginia to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

# # #

## CABLE FRANCHISE AREAS

### VIRGINIA

- - Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Virginia.
- - About 1.9 million of the 2.6 million TV households in Virginia subscribe to a cable service, which equates to about 71% of all Virginia households.

[Map of the state of Virginia and certain surrounding states with portions in color.]

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

VIRGINIA

- - In Virginia, only those DBS TV households within the Greensboro et al, Raleigh-Durham and Washington, D.C. television markets have a fully competitive multi-channel alternative to cable -- WITH local channels.
- - Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- - DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- - In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the three markets in Virginia in which DIRECTV and DISH Network began delivering local channels.

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

VIRGINIA

- - As shown by this map, Virginia TV households outside the Greensboro et al, Raleigh-Durham and Washington, D.C. television markets do not have a true competitive alternative to cable.
- - Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- - Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 10 local channel markets in Virginia.

[Map of the state of Virginia and certain surrounding states with portions in color and the phrase "7 TV Markets Unserved" written across it.]

Source: Nielsen Media Research, Sept. 2001;  
EchoStar, HUGHES, Feb. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

- - The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- - The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- - The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

## SEC LEGEND

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. FEBRUARY 2002

THE BENEFITS OF THE ECHOSTAR/HUGHES MERGER

---

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 4 MARKETS IN WASHINGTON.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Washington, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Washington to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

-----  
3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

---

WASHINGTON

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Washington.
- o About 1.5 million of the 2.2 million TV households in Washington subscribe to a cable service, which equates to about 69% of all Washington households.

[Map of the state of Washington with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

WASHINGTON

- o In Washington, only those DBS TV households within the Portland and Seattle-Tacoma television markets have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the two markets in Washington in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Washington and certain surrounding states with portions in color and with the phrase "438,000 DBS Subscribers" written across it.]

SKYRESEARCH, FEB. 2002; ECHOSTAR AND  
DIRECTV, JAN. 31, 2002

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

WASHINGTON

- o As shown by this map, Washington TV households outside the Portland and Seattle-Tacoma television markets do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 4 local channel markets in Washington.

[Map of the state of Washington and certain surrounding states with portions in color and the phrase "2 TV Markets Unserved" written across it.]

SKYRESEARCH, FEB. 2002; ECHOSTAR AND  
DIRECTV, JAN. 31, 2002

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

---

WASHINGTON

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 4 markets in Washington.

[Map of the state of Washington and certain surrounding states with portions in color and the phrase "All 4 Markets Served" written across it.]

LEGEND

---

7 THE ECHOSTAR/HUGHES MERGER SOURCE: NIELSEN MEDIA RESEARCH, SEPT. 2001;  
ECHOSTAR, HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]

[Picture of satellite.]

[110 degrees]

[Picture of satellite.]

[101 degrees]

[Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative Channels Today" written across it.]

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

---

WASHINGTON

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Washington with portions in color.]

LEGEND

[Colored box.] Households Without Broadband Access

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

WASHINGTON

- o The merger will bridge the digital divide in Washington by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Washington and the country to a digital "have."

[Map of the state of Washington filled entirely with color.]

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

---

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

[Map of the United States with portions in color.]

SEC LEGEND

-----

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN WEST VIRGINIA

[ECHOSTAR LOGO]

[HUGHES LOGO]

-----  
FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 9 MARKETS IN WEST VIRGINIA.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in West Virginia, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in West Virginia to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

THE ECHOSTAR/HUGHES MERGER  
LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN WISCONSIN

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 9 MARKETS IN WISCONSIN.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

-----  
...CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Wisconsin, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Wisconsin to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

3 THE ECHOSTAR/HUGHES MERGER

CABLE FRANCHISE AREAS

-----  
WISCONSIN

- o Despite the rapid growth of DBS since 1994, cable television clearly remains the dominant provider of multi-channel pay TV services across Wisconsin.
- o About 1.2 million of the 2 million TV households in Wisconsin subscribe to a cable service, which equates to about 60% of all Wisconsin households.

[Map of the state of Wisconsin with portions in color.]

LEGEND

[Colored box.] Cable Franchise Areas

HOUSEHOLDS WITH ACCESS TO DBS WITH LOCAL CHANNELS

---

WISCONSIN

- o In Wisconsin, only those DBS TV households within the Milwaukee and Minneapolis-St. Paul television markets have a fully competitive multi-channel alternative to cable -- WITH local channels.
- o Competitive alternatives to cable did not seriously take form until the launch of DIRECTV(R) in 1994, later joined by DISH Network in 1996.
- o DBS offered more channels and superior picture and sound quality compared to cable, with one notable exception: consumers were not able to receive their local channels via satellite.
- o In 1999, Congress changed the law, allowing satellite carriers to offer local channels. Only at this point did DBS become a viable competitive alternative to cable, at least in the two markets in Wisconsin in which DIRECTV and DISH Network began delivering local channels.

[Map of the state of Wisconsin and certain surrounding areas with portions in color and with the phrase "477,000 DBS Subscribers" written across it.]

HOUSEHOLDS WITH NO COMPETITIVE ALTERNATIVE TODAY

-----  
WISCONSIN

- o As shown by this map, Wisconsin TV households outside the Milwaukee and Minneapolis-St. Paul television markets do not have a true competitive alternative to cable.
- o Customers who live in markets in which DBS does not provide local channels are forced to either pay additional subscription fees for a basic cable service to receive their local channels, or install an off-air roof-top antenna -- and hope for good reception.
- o Neither DIRECTV nor DISH Network have sufficient spectrum, alone, to provide all local channels as well as the national pay cable networks to viewers in every one of the 9 local channel markets in Wisconsin.

[Map of the state of Wisconsin and certain surrounding states with portions in color and the phrase "7 TV Markets Unserved" written across it.]

TV HOUSEHOLDS WITH COMPETITIVE ALTERNATIVE AFTER MERGER

-----  
WISCONSIN

- o DIRECTV and DISH Network engineering teams have developed a system that is TECHNOLOGICALLY FEASIBLE and ECONOMICALLY VIABLE for the merged company to deliver full local broadcast service, in all 210 U.S. television markets, including full compliance with federal must carry provisions.
- o The merger of DIRECTV and DISH Network will enable a fully competitive cable alternative -- DBS service with local channels -- in EVERY television market across the country, including all 9 markets in Wisconsin.

[Map of the state of Wisconsin and certain surrounding areas with portions in color and the phrase "All 9 Markets Served" written across it.]

SEPT. 2001; ECHOSTAR,  
HUGHES, FEB. 2002

WITHOUT MERGER: INEFFICIENT SPECTRUM USE

---

- o The merger will end the inefficient use of spectrum by eliminating the need for each company to transmit more than 500 channels of duplicative programming.
- o The merger will combine each company's spectrum and advanced satellite assets, making the plan technically achievable.
- o The merger will combine the companies' subscriber bases, making service to smaller markets commercially feasible.

[119 degrees]                      [110 degrees]                      [101 degrees]  
[Picture of satellite.]   [Picture of satellite.]   [Picture of satellite.]

[Map of the United States with the phrase "Over 500 Duplicative Channels Today" written across it.]

---

WITH MERGER: SPECTRUM EFFICIENCIES ACHIEVED

-----  
WISCONSIN

o Implementation could begin immediately following merger approval, and the rollout can be completed as soon as 24 months later, allowing delivery of local channels to all 2 million TV households in Wisconsin.

[119 degrees]                      [110 degrees]                      [101 degrees]

NATIONAL PRICING

---

- o Consumers across the country will pay the same price for their DBS subscription services, regardless of where they reside. We are one nation, and we will offer one rate card.
  
- o For example: a resident of Milwaukee will pay the same fee for his or her local channel package as a customer in Cedarville, Ohio; a resident of Burlington, Vermont, will pay the same price for HBO as a customer in Salt Lake City; and a resident of Mountlake Terrace, Washington, will pay the same price for a basic 125-channel programming package as a customer in New York City.

[Map of the United States with the phrase "One Nation, One Rate Card" written across it.]

---

BROADBAND: THE DIGITAL "HAVE NOTS"

---

WISCONSIN

- o Another benefit of the EchoStar and HUGHES merger comes in the form of competitively priced high-speed Internet access, and the end of the so-called "digital divide" that exists in the "wired" world today.
- o This map clearly shows the areas where households do not have access to DSL or cable modem service -- the digital "have nots".
- o The primary reason for this is simply the expense of rolling out "wired" technologies, such as DSL and cable modem service, to millions of homes, particularly to those beyond the boundaries of urban and suburban markets.
- o Both EchoStar and HUGHES believe many of the "have nots" would be interested in fairly-priced, bundled video and high-speed data services.

[Map of the state of Wisconsin with portions in color.]

MERGER BRIDGES THE BROADBAND "DIGITAL DIVIDE"

---

WISCONSIN

- o The merger will bridge the digital divide in Wisconsin by providing consumers in every community with a competitively priced high-speed "broadband solution" available to them regardless of their location.
- o The efficiencies gained from the merged company's combined customer base will enable a high-speed Internet service to be offered that is not only price-competitive with existing providers in urban settings, but also a tremendous benefit for rural customers for whom DSL and cable modem service are unlikely to be available for years to come, if ever.
- o The merger will provide the technical and economic infrastructure to convert every household in Wisconsin and the country to a digital "have."

[Map of the state of Wisconsin filled entirely with color.]

---

12 THE ECHOSTAR/HUGHES MERGER

SOURCE: THE BUXTON COMPANY,  
"BROADBAND DEPLOYMENT,"  
JAN. 2002

ONE NATION, ONE DISH

---

- o Bringing all local channels and broadband service to all consumers' homes is not a simple endeavor. However, the DIRECTV and DISH Network engineering teams have designed a system that enables the receipt of local channels, other entertainment services AND high-speed Internet access using one consumer-friendly mini-dish.
- o An 18 x 22-inch dish will enable the receipt of signals from the merged company's three orbital slots.
- o New equipment will process signals from existing spacecraft as well as advanced satellites the merged company will launch to deliver the remaining local broadcast channels and high-speed Internet services to consumers in all states.
- o Equipment will be provided to existing DBS customers AT NO CHARGE -- including free service call and installation -- to receive their new local channels.

[Photo of a man on a ladder installing a DirectTV satellite dish on the side of a house.]

---

CABLE INDUSTRY REMAINS DOMINANT MULTI-CHANNEL VIDEO PROVIDER

---

- o Eight years after the introduction of DBS services, 78% of multi-channel video subscribers still receive their programming from a franchised cable operator.
- o Cable operators' market dominance has been strengthened by their upgrades to digital video and cable modem services.
- o The cable industry's market dominance is further evidenced by its continual price increases to consumers: 37% on average since 1996.
- o The spectrum constraints which exist today will forever keep a separate DIRECTV and DISH Network at a competitive disadvantage to cable for those consumers who live in markets where local channels are not offered by DBS.

SEC LEGEND

-----

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. THE ECHOSTAR/HUGHES MERGER

LOCAL CHANNELS AND COMPETITIVE BROADBAND  
FOR ALL CONSUMERS IN WYOMING

[ECHOSTAR LOGO]

[HUGHES LOGO]

---

FEBRUARY 2002

February 26, 2002

EchoStar Communications Corporation, Hughes Electronics and General Motors believe that consumers will reap tremendous benefits from the merger of EchoStar and HUGHES. The companies' two services, DISH Network and DIRECTV(R), today each transmit a total of MORE THAN 500 IDENTICAL CHANNELS. Consumers will benefit from the massive increase in Direct Broadcast Satellite (DBS) satellite capacity that will result from the elimination of this DUPLICATIVE PROGRAMMING. Indeed, as a direct result of the completion of this merger, consumers across the continental United States, Alaska and Hawaii will have access to local broadcast channels with digital-quality television picture and CD-quality sound IN EVERY ONE OF THE 210 TELEVISION MARKETS NATIONWIDE AND SPECIFICALLY ALL 7 MARKETS IN WYOMING.

Subsequent to the announcement of the merger agreement on October 28, 2001, a series of pre-merger transition meetings between DISH Network and DIRECTV engineers have been held to analyze the technical feasibility of a "Local Channels, All Americans" plan by which the merged company could offer every U.S. consumer access to satellite-delivered local television signals. After an exhaustive examination of each company's spectrum and satellite assets, the engineers determined that this plan could become a reality. In a satellite application filed yesterday with the Federal Communications Commission, EchoStar and HUGHES detailed a TECHNICALLY AND COMMERCIALY FEASIBLE PLAN to build, launch and operate spot-beam spacecraft that will serve all 210 Designated Market Areas ("DMAs") in the United States, including full compliance with must carry requirements.

New set-top boxes and satellite dishes will be deployed that will be capable of receiving satellite signals from multiple orbital positions. The new receiving equipment will be made available FREE OF CHARGE to all existing DIRECTV and DISH Network subscribers who may need it in order to receive their local channels.

CONTINUED...

---

... CONTINUED

Consumers across the country will pay the same price for services delivered by the merged DBS service, i.e., ONE NATION, ONE RATE CARD, regardless of a subscriber's location. Implementation of the plan will begin immediately upon regulatory approval of the merger, and the rollout can be completed as soon as 24 months thereafter.

The merged company also will establish itself as a source of meaningful satellite-based broadband competition to cable modem and DSL offerings, fulfilling the mission to provide affordable high-speed Internet access to all of America, including the most rural areas of the country. The "digital divide" in the United States is real: some 40 million households in the United States do not have access to high-speed Internet and data services, in large part due to the high cost of wiring homes for these services in less densely populated areas.

Combined, EchoStar and HUGHES will create a more robust satellite platform that will liberate these digital "have nots" by serving every household in the nation, including every household in Wyoming, and will have the subscriber base and financial means to move current Ku-band satellite broadband offerings from their status as expensive "niche" services to a more competitive price point for consumers, and then ensure that next-generation Ka-band satellite broadband service becomes a reality for consumers everywhere in the United States.

The combined EchoStar-HUGHES will achieve a new level of vigorous competition to incumbent cable operators, and will not have anticompetitive effects in any market. As this booklet illustrates, the benefits from this merger will allow all consumers in Wyoming to receive their full complement of local channels and national entertainment networks, as well as provide a new source of meaningful satellite-based broadband competition.

In connection with the proposed transactions, General Motors Corporation ("GM"), Hughes Electronics Corporation ("Hughes") and EchoStar Communications Corporation ("EchoStar") intend to file relevant materials with the Securities and Exchange Commission, including one or more Registration Statement(s) on Form S-4 that contain a prospectus and proxy/consent solicitation statement. Because those documents will contain important information, holders of GM \$1-2/3 and GM Class H common stock are urged to read them, if and when they become available. When filed with the SEC, they will be available for free at the SEC's website, [www.sec.gov](http://www.sec.gov), and GM stockholders will receive information at an appropriate time on how to obtain transaction-related documents for free from GM. Such documents are not currently available.

GM and its directors and executive officers, Hughes and certain of its officers, and EchoStar and certain of its executive officers may be deemed to be participants in GM's solicitation of proxies or consents from the holders of GM \$1-2/3 common stock and GM Class H common stock in connection with the proposed transactions. Information regarding the participants and their interests in the solicitation was filed pursuant to Rule 425 with the SEC by EchoStar on November 1, 2001 and by each of GM and Hughes on November 16, 2001. Investors may obtain additional information regarding the interests of the participants by reading the prospectus and proxy/consent solicitation statement if and when it becomes available.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Materials included in this document contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. The factors that could cause actual results of GM, EchoStar, Hughes, or a combined EchoStar and Hughes to differ materially, many of which are beyond the control of EchoStar, Hughes or GM include, but are not limited to, the following: (1) the businesses of EchoStar and Hughes may not be integrated successfully or such integration may be more difficult, time-consuming or costly than expected; (2) expected benefits and synergies from the combination may not be realized within the expected time frame or at all; (3) revenues following the transaction may be lower than expected; (4) operating costs, customer loss and business disruption including, without limitation, difficulties in maintaining relationships with employees, customers, clients or suppliers, may be greater than expected following the transaction; (5) generating the incremental growth in the subscriber base of the combined company may be more costly or difficult than expected; (6) the regulatory approvals required for the transaction may not be obtained on the terms expected or on the anticipated schedule; (7) the effects of legislative and regulatory changes; (8) an inability to obtain certain retransmission consents; (9) an inability to retain necessary authorizations from the FCC; (10) an increase in competition from cable as a result of digital cable or otherwise, direct broadcast satellite, other satellite system operators, and other providers of subscription television services; (11) the introduction of new technologies and competitors into the subscription television business; (12) changes in labor, programming, equipment and capital costs; (13) future acquisitions, strategic partnership and divestitures; (14) general business and economic conditions; and (15) other risks described from time to time in periodic reports filed by EchoStar, Hughes or GM with the Securities and Exchange Commission. You are urged to consider statements that include the words "may," "will," "would," "could," "should," "believes," "estimates," "projects," "potential," "expects," "plans," "anticipates," "intends," "continues," "forecast," "designed," "goal," or the negative of those words or other comparable words to be uncertain and forward-looking. This cautionary statement applies to all forward-looking statements included in this document.
