ECHOSTAR APPLAUDS LETTER ON DIGITAL TV SENT BY FCC CHAIRMAN POWELL

Littleton, Colo.– (BUSINESS WIRE) –April 5, 2002 – EchoStar Communications Corporation (NASDAQ: DISH) enthusiastically endorses Federal Communications Commission Chairman Michael Powell’s efforts as well as those of Congressman Billy Tauzin, R-La., and Sen. Ernest Hollings, D-S.C., in spurring the digital TV transition.

Further, EchoStar believes that satellite TV providers are instrumental in driving the digital television transition. As EchoStar has stated numerous times, EchoStar’s pending merger with Hughes Electronics Corporation presents one of the best opportunities to stimulate programmers into building more digital content and to create demand for digital television by American consumers. Satellite TV providers are already leading the way for the digital transition today by offering up to four high-definition TV channels nationwide from popular programmers and networks like HBO, Showtime and CBS. The merger would provide the necessary satellite capacity to allow the combined company to provide American consumers, for the first time, with a minimum of 12 high-definition television channels on a nationwide basis. With increased choice of digital TV programs to watch, viewers would have a more substantial reason to make the investment in digital TV technology, and greater consumer demand would help drive down equipment prices and spur even more digital TV programming. We believe all this will more quickly help Congress realize the important goal of reclaiming analog broadcast spectrum.

The consumer electronics industry agrees: major manufacturers Thomson Multimedia, Sharp Electronics Corporation, and JVC as well as consumer electronics stores like Circuit City Stores and RadioShack Corporation have all filed letters of support for EchoStar’s merger, stating that

increased HDTV programming carried by the merged entity would speed consumer adoption of digital technology.
