## Hughes Defense & Intelligence Systems Division to Deliver Information on Its Newest Technologies at SATELLITE 2015

### Members to Participate in Government and Military Forum on Mobility

WASHINGTON, March 13, 2015 /PRNewswire-USNewswire/ --

**What:** Hughes Network Systems, LLC (HUGHES), the global leader in broadband satellite networks and services, will present new satellite technologies enabling mobility and airborne missions for defense and intelligence at the SATELLITE 2015 conference.

SATELLITE 2015 consists of several market tracks including Government and Military managed by the Satellite Industry Association. Hughes DISD vice president and general manager, Rick Lober, will participate in the panel entitled **Government Mobility Solutions: Offering Flexibility in an Uncertain World**. The panel will discuss future military requirements for mobility networks by international government, military and civil space sectors and the impact these requirements have on the business and technology plans of equipment manufacturers, service providers and satellite operators.

Reporters and attendees are encouraged to attend the panel and stop by the Hughes booth for more information. Staff will demonstrate and discuss airborne products and small terminals.
