On April 11, 2008, SES Americom announced that it has declared to insurers that the AMC-14 satellite is now considered a total loss, due to a lack of viable options to reposition the satellite to its proper geostationary orbit. DISH Network had intended to lease the entire capacity of the satellite from EchoStar Corporation in order to, among other things, increase the number of high definition channels that DISH Network offers. As previously announced, our plans to enhance our HD programming line-up this spring remain on track and we have two more satellites scheduled for launch later this year to continue our HD rollout and reach our year-end goal of 100 local HD markets and 100 national HD channels. We are continuing to assess alternative sources of satellite capacity that will mitigate any affect that this development may have on our longer term plans to roll out additional local HD markets and national HD channels. DISH Network will not incur any financial liability as a result of the AMC-14 satellite being declared a total loss.
